My Courses / Introduction to the Revised ACI 336.1 Specificatio ...

The Evolution of ACI CODE 562 – What's New in 2025 - Part 2

Expires at the end of the day on 11/08/2025

Please complete Course Material.

Overview Course

Go to Course **Click here**

Course Overview

This course provides a detailed overview of the first major revision in more than twenty years to the ACI 336.1 Specification for the Construction of Drilled Piers. Participants will gain practical insight into the updated provisions, with a focus on how specifiers can effectively reference and tailor the specifications for their projects. The session will also address key considerations for achieving quality and performance in drilled pier foundations. This program is ideal for engineers, contractors, and other professionals involved in projects utilizing drilled pier foundation systems.

Learning Objective

1. Identify and describe the key changes to the ACI 336.1 specification.
2. Explain how specifiers and contractors can interpret and implement the revised requirements.
3. Discuss critical elements influencing the successful installation and long-term performance of drilled pier foundations.
4. Evaluate common construction methods for varying subsurface conditions.

Instructions

Study the materials included in this module. Then, complete and pass the corresponding 10-question quiz with a score of 80% or higher to receive a certificate for 0.1 CEU (1.0 PDH).
Continuing Education Credit: 0.1 CEU (1.0 PDH)
Approved by AIA (LU) and ICC
Access Period: 30 days
